Profile

Enthusiastic and motivated undergraduate Software Engineering student adept at testing software products, developing and implementing new software platforms, and providing IT support and assistance to colleagues. Possessing great analytical skills. Ability to work in team environments, and strong attention to detail, Alec is seeking for an IT-related internship with a forward-moving company.

Projects

Login Page

Created with Node.js, MySQL, CSS, HTML

Login page that takes in users emails and passwords and checks them against a relational database system. This project also allows users to create accounts as well as edit their own accounts. Majority of the work done on the backend.

To-Do list App

Created with Node.Js, MySQL, CSS, HTML

Application that takes information from a MySQL database and returns it in the form of a To-do List. Whereas parts of this list can be modified and edited.

Calculator App

Created with vanilla JavaScript, HTML, CSS

Scientific calculator web space that contains multiple different elements such as text boxes, buttons and Cascading style sheets. Most of the work is being done on the backend learning how to manipulate variables.

Education

Mesa Community College/ Associates in Science

August 2020 - December 2023, Dobson campus

Enrolled currently in Mesa Community College, expected to graduate the 2023 fall semester. Learned the foundations of Computer Science such as Data Structures and algorithms. While learning many different paradigms such as OOP, functional, imperative, logic and Service-Oriented.
